

SAYANA V A

✉ assayana03@email.com | ☎ +91-85905-76748 | 📍 Thrissur, Kerala, India | [LinkedIn: www.linkedin.com/in/sayana-va](#) | [GitHub: https://github.com/sayana-va](#)

PROFESSIONAL SUMMARY

Detail-oriented and analytical Fresher Data Analyst with strong proficiency in SQL, Python, Excel, and Power BI. Adept at transforming raw datasets into actionable business insights through data cleaning, visualization, and statistical analysis. Eager to leverage academic knowledge and hands-on project experience to contribute to data-driven decision-making in a dynamic organization.

TECHNICAL SKILLS

Languages:	Python (pandas, NumPy, matplotlib, seaborn), SQL
Databases:	MySQL, PostgreSQL, SQLite
Visualization:	Microsoft Power BI, matplotlib, seaborn
Tools:	Microsoft Excel (Pivot Tables, VLOOKUP, Power Query), Jupyter Notebook, Git/GitHub
Concepts:	Data Cleaning, Exploratory Data Analysis (EDA), Statistical Analysis, A/B Testing, KPIs, Dashboard Design

PROJECTS

Sales Performance Analysis | *Personal Project*

[Github Repo](#)

- Analyzed the **Global Superstore dataset (10,000+ records)** using Python to uncover patterns in sales, shipping, and customer behaviour
- Performed **data cleaning, transformation, and preprocessing**, handling missing values and improving data quality for accurate analysis
- Conducted **in-depth Exploratory Data Analysis (EDA)** to identify trends in regional sales, product categories, and customer segments
- Discovered a strong correlation between **Sales and Shipping Cost**, and significant **profit variation across regions**
- Built **data visualizations and dashboards** to present insights in a clear, business-friendly manner

Tools: Python, Pandas, NumPy, Matplotlib, Seaborn

Customer Churn Prediction & Analysis | *Personal Project*

[Github Repo](#)

- Analyzed a **7,000+ customer dataset** to predict churn using machine learning techniques
- Performed **data cleaning and preprocessing**, handling missing values, encoding categorical variables, and scaling feature
- Conducted **Exploratory Data Analysis (EDA)** to identify key churn drivers such as contract type, tenure, and monthly charges
- Discovered that **customers with monthly contracts and high charges are more likely to churn**
- Visualized insights using **Matplotlib, Seaborn, and Plotly** for better business understanding

Tools: Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Plotly

COVID-19 Global Trends Analysis | *Personal Project*

[Github Repo](#)

- Analyzed **COVID-19 data at state and district level** using Python to understand spread patterns and trends
- Extracted real-time data from APIs using **Requests** and processed complex **nested JSON structures**
- Performed **data cleaning and preprocessing**, handling missing values, duplicates, and inconsistencies for accurate analysis
- Utilized **Pandas and NumPy** for data transformation, aggregation, and time-based analysis (weekly & monthly trends)

- Applied **SQL (PostgreSQL)** to query datasets and generate meaningful KPIs for deeper insights
- Conducted **Exploratory Data Analysis (EDA)** to track infection trends, growth patterns, and regional variationsPresented actionable insights in a structured report format mimicking a professional business analysis deliverable

Tools: Python, Pandas, NumPy, Requests, JSON, PostgreSQL

EDUCATION

Bachelor of Arts in [English] | *Calicut University* | Graduated: Apr 2024

- Developed strong skills in **communication, critical thinking, and analytical reasoning**
- Self-learned **Data Analysis, Python, SQL, and Machine Learning** through projects

CERTIFICATIONS & TRAINING

- Advance Diploma in Data Analytics – GTEC COMPUTER EDUCATIONAL CENTER (2026)

CORE COMPETENCIES

Analytical Thinking • Problem Solving • Data Storytelling • Attention to Detail • Communication • Team Collaboration • Time Management • Business Acumen
